Kaleb 039;s Home Made Web Browser Crack

What's New in the?

Kaleb's Home Made Web Browser is a lightweight web browser for browsing the web with all the features found on bigger browsers, but none of the comfort. By default, it can be used as your browser and includes basic tools that are implemented as a standard control, which you can easily get to by accessing the File menu. It includes a standard browser menu, with additional features and tools, including bookmarks and history. The interface is not as polished as some of the bigger browsers, but the minimalistic look is quite fun and there are some interesting features to keep you entertained. Please note that Kaleb's Home Made Web Browser will only work on Windows, although there are attempts to make it run on other platforms as well, but they don't look very trustworthy.
