I know, using ajax may be an easy solution, but I'm currently using an old site and this is the only solution. Here's my code, and you can see the result is it's the exact same result when I call it inside a jquery function and outside of it. function updateLadd($db_host,$db_port,$db_username,$db_password,$db_dbname,$limit,$offset,$sort) {

```php
$host=""; $port=""; $username=""; $password=""; $db_dbname=""; $limit = 0; $offset = 0; $sort = "";
$conn=mysql_connect($host,$username,$password); mysql_select_db($db_dbname, $conn);

What's New In AutoCAD?

Feedback shows the area in red so you can change it before you start the markups. Staying up to date on the latest technology is a challenge. New products, advancements, and new editions are changing the world of CAD every day. To stay on top of these changes, we are actively updating our technology. In the last year we added an electronic scanning feature to AutoCAD LT, and with the release of AutoCAD 2020, we added a completely redesigned user interface, as well as other new features. AutoCAD 2023 continues to provide the most intuitive and productive user experience in the CAD industry. Read about our features in the AutoCAD 2020 release announcement. New features in the next release of AutoCAD: Markup Import Markup Assist Markup Assist allows you to quickly send feedback to others about your marks or other drawings, then return to the drawing you were working on and add your changes with just a few clicks. Export/Import Markups You can now save your own markups directly to a file, including annotating a graphics file. Selection Restrictions Select the area you want to mark up without setting a shape. This helps you to avoid getting stuck editing the wrong area. Automatic Zooming on Outlines Changes to the Outline fill and line settings are reflected in all the views of your drawing, helping you quickly adjust properties such as endpoints and fills without having to close and reopen the drawing. 4K Support We have added support for 4K monitors, including 4K displays on laptops. Proportional Editing When you edit a proportional setting, such as stroke width or gap, you can zoom the view to fit the new size. You can also zoom the view by simply holding down the CTRL key and scrolling. User-definable Zoom You can change the default zoom factor to a setting that works best for your situation. You can also set the default zoom to use any setting of the Zoom dialog box. Zoom Snapping When you zoom, the zoom area automatically snaps to the current view of the drawing. The Open view can zoom and pan. The Zoom dialog box can zoom and pan when the view is in a different workspace. You can change the default zoom factor, and set the zoom to use any setting of the Zoom dialog box.
