To identify the molecular defect(s) in severe type II hyperprolinemia. Hyperprolinemia type II (HPP2), a metabolic disorder of ornithine and proline metabolism, is a rare autosomal-recessive disorder. We identified the molecular defect in two patients with severe HPP2. Molecular analysis included identification of the causative mutation in the ornithine carbamoyltransferase gene. Enzyme activity was assayed in peripheral lymphocytes and fibroblasts. DNA sequence analysis identified a patient with a single base deletion in exon 4 of the gene which predicts a frameshift and premature termination codon. The second patient has a missense mutation in exon 3 (Glu167Lys) which is predicted to be pathogenic based on the severity of the clinical phenotype. Residues involved in substrate binding are present in close proximity to the mutated residue. A five-fold decrease in ornithine carbamoyltransferase activity was identified in the patients' peripheral lymphocytes. Histidine-dependency of the mutant enzyme was confirmed by a patient treated with hydroxyproline. In the patient with the most severe clinical phenotype, the storage material was identified as altered cytokeratin. The molecular defect in severe HPP2 is characterized by a mutation in the ornithine carbamoyltransferase gene. Lymphocytes and other tissues from affected patients were found to have a five-fold decrease in enzyme activity. This is a weird one, and for the most part isn't a record I would play often. The strang

Thank you so much, Lily Labeau, for letting me into your world! Yeah because i guess im missing some type of bad joke in it now, this was not a joke at all( really, really just needed to fill up this thread, so if u got any comments, tell me then if it seems like i am trolling), my only questions are: i was wondering if it was to calm her down more by tying her up, or because it would be nice to turn her on by tying her up.Did you feel like her rate of breathing was going down, since she was distracted by you to the point where she was just a prisoner?And what do you think she would gain from opening your shirt?Was she trying to get your wallet? lolMy next question is if you would want to continue the game with her tied up like this(by the way, you can show her how to untie her, if you want to ask her to do something about it) should you ask her to leave? ah i know, lol you're right, i'm a bunch of shit like that. (since i have exams at the end of the week so i really should get studying done. i had bad chinese food and thinking about it is my new favourite past time. i shouldnt let that eat my time) these two are absolutely amazing and i wanna play this game for the rest of my life! i have never experienced anything like it before, and i am seriously impressed! why is this thread dead? I wanna know more about it! for more information if you are interested feel free to contact me. I wanna know how she deals with your punishment.I wanna know how she reacts when you let her go for a few days.I wanna know how to I get her to stop squirting from when you dont want her to squirt.I wanna know if her orgasm is different when she is tied up.I wanna know how she reacts when you cum in her
