## Elden Ring: Deluxe Edition [+ DLC] For PC

The Kingdom of Elden, whose lands lie between the realms of mortals and immortals, sits at the center of a vast and diverse world. Through the preservation of Elden's magical energy, the Elden Shield, life continues to flourish across the multiverse. The Great Elden Shield is spread across the multiverse, and is known as the magical protector of all worlds, where the Elden Shield maintains the balance of magic. The eldenian power flowing through the Great Elden Shield holds the power of those who live, and the magical lines of the Great Elden Shield can be intertwined with those of other worlds. Even if the Great Elden Shield is broken, that which lives will always retain the power of the primal elden magic. The Great Elden Shield protects the Land of Dawn that lies between Elden and the multiverse. Unearthed by humans, this land contains a magic never before seen in the world: the power to change the past. The four elements of the world-water, wind, fire and earth-coexist, and at a point in the past, the sky itself separated, and the four elements parted. At the time, a great battle occurred between the four elements, and a magical barrier was created. The elder dragon Arthar protected this magic barrier. Half-human and half-dragon, Arthar fought for almost 20 years in the Land of Dawn, until the power of his magic exhausted itself. The power of Arthar's magic fused with the magic of the four elements, and the five-dimensional world that Arthar protected took shape. At the time when Arthar was protecting the world, the dragon's connection to human society was also at its weakest, and he began to sleep, becoming mired in slumber. After Arthar's death, the people who lived on this land did not know about the change that had taken place, and so they did not know the reason behind Arthar's awakening. They just saw him as a harmless dragon, and took him for granted. The Land of Dawn was protected by the four elements and Arthar for a long time. However, the dragon Arthar had forged close ties with humans, and so they built a house and raised livestock in the land. After Arthar had awoken, the people in the Land of Dawn built houses, planted crops,

If you don't know yet, I'm one of the reviewers for "Twilight Time", a subscription service for old movies. I love finding something new, especially during the summer months since it's nice to fall asleep to the rain/sun combo. The Handmaid's Tale is the first film in their "Weird War II" collection, and a quick synopsis: "The entire population of the United States is on edge as never before. A young mother, June, witnesses her son, Dougie, accidentally killing a guard in front of her, and when the whole town finds out, she's sentenced to die. June is sent to what she's called in the neighborhood "The Barn", where other women are kept and bred for use as handmaids to the elite. June's friend, Offred, can't escape The Barn, but must survive and do her best to find a way to rescue her son." The production quality of the film wasn't great, but it was a new film, and I was still excited. What I didn't realize, or maybe just didn't have enough time to think about was the strong parallels between the handmaid's and the suffragettes. The handmaid's are considered property in the same sense that the suffragettes were. They had no identity, no right to be heard. I'm sure it isn't a completely accurate take on what the women's movement was, but it was done well and gave a good

vibe of what was to come. The handmaid's are kept in the most deplorable conditions, with the late "Atlas" and his family being the most prominent example. The thing that stuck out to me was that the husband even had an orgasm after raping his wife, taking a baby away from her. That's not something I've ever heard of, and when
