These motion capture data are used to improve all gameplay modes and create various control techniques. The enhanced player models, ball physics, goal animations, field settings and match styles are all powered by motion capture data. Watch FIFA 22 gameplay in motion, including tackling, ball control, shooting, and goal celebrations, or visit to download a demo and play now. Key features: HyperMotion Technology powers all gameplay in FIFA 22. Controls are developed and tailored to each player's specific abilities. This includes the ability to set or move the shot stop on-ball. Individual motion capturing creates gameplay styles that are suitable for each player's different strengths, based on real-life movement data collected from the players and implemented in the game. Goalkeepers have an enhanced ability to move in FIFA 22, both when they are preparing to come out to make a save and when they are in-game and saving a goal. Goalkeeper handling has been refined in FIFA 22. Players can now more accurately stop crosses and free-kicks, all while reacting to saves. Ball flight has been improved in FIFA 22. Players more realistically handle and control the bounce of the ball, which changes based on the size, location and trajectory of the kick. Each team has an own kit and color scheme in FIFA 22, including unique short sleeves and long-sleeved jerseys, which are available to all players. As in FIFA 21, skill moves, triggers and counter-attacks all feature in FIFA 22. In FIFA 22, players have a one-time open license to train with FIFA's five most recent top 25 players in the real-life Fifa Rank\* based on real-life play. The license will be granted to the player for the length of time the player is in the FIFA Top 25 list. Additionally, the player will be granted additional players in the real-life list and will be able to play against the five remaining players in the real-life list. Players can earn additional rewards, such as licenses for a particular era of the player's career (era-specific licences) or licences for a particular club in the player's career (club-specific licences), as they climb up the real-life list. FIFA 22 will also feature a career mode that players can use
