The information is the result of the research into the perceptions of Polish and Slovak children on the subject of sports and physical activity. The article presents the results of a study conducted on the basis of a survey questionnaire intended to the parents of the children aged 6-12 years from Baranowskie, Zabie and Winogradow. The main objectives of the study were to analyze the relationship between the perception of children and their parents on a number of issues related to sports and physical activity. The study shows that the most recognized and frequented places for sports activities among the children are the school playground and the home. It turned out that the parents' higher education and economic status are good predictors of the number of times the children visit the physical education classes. Practicing sports
