AutoCAD Product Key was created by Computer-Assisted Design, Inc., a company that evolved out of a group of 3D modeling tools developed at the Computer-Aided Design Center at the Massachusetts Institute of Technology (MIT) in Cambridge, Massachusetts. According to the MIT group's history: "AutoCAD Cracked 2022 Latest Version was born in the late 1970s with the same enthusiasm and drive for improvement that gave birth to MIT CAD. A group of MIT students created the first version of AutoCAD at MIT in Cambridge, Massachusetts. It was released as an MS-DOS version in October 1978, and quickly established the foundation for what is now a \$100 million business. Many of the original programmers left the company in the early 1980s to form their own company and market their own version of AutoCAD, CADV. The new company, Computer-Assisted Design, Inc., changed its name to CAE in 1984. CAE is now known as Autodesk, Inc." AutoCAD History 1: Inception In November of 1978, a group of MIT students gathered to discuss ideas for their joint master's thesis project. They were the first to use the term "AutoCAD", and soon received their first funding for their idea from the MIT Educational Foundation. They developed a prototype of a graphics-based drafting program and showed it to the MIT Educational Foundation in early 1978. At that time, the foundation was contemplating starting a CAD company, and the students said the name "AutoCAD" would be ideal for a new product. The students hired a manager, Bill Graeme, to help them prepare a market survey of the potential CAD market, as well as other legal and financing matters. At that time, the market research was performed by a survey company called Salton Research. This survey showed the CAD market was estimated to be \$300 million. The survey also estimated that it would take the CAD market two to three years to develop from \$300 million to \$1 billion. The students also chose MIT as the site for the company. On March 1, 1978, the MIT CAD group was incorporated as Computer-
