"We have two fundamental and interrelated goals with FIFA," commented Matthias Graf, Head of Pro-Soccer Studio, EA SPORTS. "We aim to develop the most authentic and immersive gaming experience possible. The most recent, engaging changes we've made to the game reflect players' reality. We want to create a living game that lets fans live, breathe and really feel the emotion of the sport. With 'HyperMotion Technology' and 'SpeedPitch,' we're putting players in the game in a way they've never seen before." FIFA '22 maintains its focus on delivering fans the most realistic gameplay to date, delivering both the game's new, best player and most authentic pitch. Developed by the Pro-Soccer Studio, FIFA '22 goes deeper than ever before into delivering the highest levels of gameplay fidelity. "Traditional button-mashing gameplay is not enough when you're playing one on one, and that's why we've developed a game that is completely based on all of the elements that make football the best sport on earth," added Graf. "By giving our players the ability to play ball control, through passes, crosses, headers, tackles, dribbling - we've taken the most authentic, intuitive and player driven experience to a new level. Playing in the game creates a completely different type of gameplay experience and we're not done yet." NEW EXPERIENCE IN '22 PLAYER EXPERIENCE - DEVELOPED ACCORDING TO THE REAL WORLD '22 puts you right in the middle of the action with all-new Goalkeeper AI that reacts to your shots. Goalkeepers are never idle. Instead, they move fluidly, react to balls that break through, and actively run out to parry shots. And for the first time in a FIFA, they will grab balls you kick clear from their goal. Goalkeepers are a critical element of the '22 experience, and you will need to master this element if you want to master the game. GOALKEEPERS - THE WHOLE NEW GAME Goalkeepers need to defend and attack, like any other player. Playing with a FIFA '22 Goalkeeper is a completely new type of experience. Gone are the days of
