Publishing for AutoCAD AutoCAD's format and features can be extended through publishing. PublishExtension dialog box can be used to add further objects and functions and can be used to automate the publishing process. For example, an add-on can be developed for a publishing tool to fill the database with objects. Customization AutoCAD supports customization through its Visual LISP and AutoLISP languages. Visual LISP and AutoLISP are object oriented programming languages based on Scheme, a highly functional programming language, with an extensive array of functions. The Visual LISP environment allows the use of customized tags and properties, including extending existing objects with new properties. The extension of objects with additional properties is accomplished by means of the technique of extension rather than addition, in which a library of objects is used to which new properties can be added. Visual LISP is used for system-wide customization and for extending existing objects with custom properties. As of AutoCAD 2016, Visual LISP is supported in AutoCAD, Architecture, Civil 3D, Mechanical, Surface, 3D Warehouse, InfraWorks, Intergraph, Map3D and many other software products. AutoLISP is a high-level scripting language which is supported on all versions of AutoCAD starting with AutoCAD 2000. It is most useful for customization of a particular document or project. AutoLISP is based on an object oriented framework. As of AutoCAD 2016, AutoLISP is supported in AutoCAD, Architecture, Civil 3D, Mechanical, Surface, 3D Warehouse, InfraWorks, Intergraph, Map3D and many other software products. Other programming languages AutoCAD supports VBA programming for Microsoft Excel and other Microsoft Office applications, a variant of Visual Basic for Applications. VBA is based on the Visual Basic programming language. AutoCAD uses VBA for developing macros. AutoLISP, Visual LISP and Visual

Basic for Applications (VBA) are available for use within AutoCAD. ObjectARX is a high-level C++ class library, a variant of C++ which uses less code than traditional C++. ObjectARX is AutoCAD-based and includes a graphic library that can be used to build custom tools for AutoCAD. It is used for creating custom add-on tools. In addition, it is a base af5dca3d97
