In contrast, AGT games are haphazardly pitched at young children much like Sierras visitor center tours, and while the primary audience of text adventures was made up of adults, it was by no means everyone. Unlike the Sierra games, AGT games never projected a clean, charming, and professional image of the kinds that would have made the we-intend-to-be-a-trustworthy-gaming-publisher aura described in the first paragraph of this story that made a Sierras game feel safe to buy. While its not for lack of trying on the part of Malmberg and his associates; too much of his time was spent attending trade shows and trying to make his \$100 registration fee back while his family continued to struggle financially and he had to do everything from both his accounting office and his typing office. To his credit, Malmberg resisted the temptation to horde the fortune that would have made him famous; instead, he passed his GAGS-based AGT games on to friends, and when they fell by the wayside, he donated them to the university library or friends. With the closest he came to capitalizing on his games were the few copies he inked to fool-around with backwards text and CGA sprites; Malmberg always maintained that he was just trying to prove to himself that he could, and his work never attracted any major attention at all, and while he may have been clinically insane, as far as I know he didnt have any mental problems. Yet while I have said many times that AGT games are the most important text adventures ever made, I wont quite go so far as to claim that they are actually the first. The first AGT game was part of my second year in high school, during which time I first played my fair share of adventure games. The first I can recall a bit more clearly than others is a text adventure on the ground floor of the DEC Federalist arcade in upstate New York which I played in the early 1990s. It was for a female computer-science student and was titled Miranda, Proteus, and the Fall of Atlantis, in that order. We play it in my basement after school, with me playing Miranda, a male engineering student playing Proteus, and a female computer science student playing the named Atlantean female in the game, although that role was just an avatar of myself for looking up the directions. I think if I could find that game again, I could write a paper to parse it out to examine the ways in which I played myself, an interesting exercise in self-reflexivity that could have fascinated and influenced me then and far longer than it did.
